

ICD-10 - There is a code for that...

Or is there? In the spirit of **April Fools Day**, listed here are several unusual codes, one of which is not real. Can you tell which ones are real ICD-10 codes and which one is "fool"ish? (The answer can be found at the bottom of the page, upside down.)

Q84.2 - Congenital malformation of hair

Y93.J1 - Activity involving piano playing

J30.81 - Allergy to dandruff

T75.01 - Shock due to being struck by lightning

Y92.59 - Casino as place of occurrence

Y93.C2 - Activity involving cellular telephone

Z56.3 - Allergy to work

Answer: The last one is really stress due to work.
